PROFESSIONAL SUMMARY

Founder-operator with a track record of building businesses from zero — most recently a fintech product (Smart Finance Lock System, in active MVP build) and a self-built consumer SaaS platform (Runsheet), covering brand, product, hands-on front-end development (React/Next.js) and go-to-market end-to-end. Strong background in client engagement, digital strategy and commercial execution, including running a prior venture that secured an exclusive partnership with the Dubai Rugby Sevens. Now looking to bring that hands-on, full-stack execution into a structured consulting or digital strategy environment.
